PROFESSIONAL SUMMARY

Senior Moodle Architect and PHP Developer with 7+ years of experience building, customising, and scaling Learning Management Systems for educational institutions and enterprise clients across Australia, the UK, and Pakistan. Deep hands-on expertise in Moodle plugin development, REST API integrations, multi-tenant LMS architecture, and remote technical leadership. Delivered end-to-end LMS platforms handling thousands of learners — from USI API compliance integrations for Australian government-regulated courses to custom block plugins and SCORM-compatible course delivery. Currently managing LMS infrastructure as Technical Support Manager at Theos Seminary while consulting part-time at SkillWare4u. Masters in Computer Science (CGPA 3.87/4.00).

Key competencies: Moodle LMS · Custom Plugin Development · PHP · Laravel · Yii2 · CodeIgniter · WordPress · MySQL · REST APIs · OAuth 2.0 · SCORM · H5P · Git · Google Cloud · Remote Team Leadership · E-Learning Architecture · LMS Performance Optimisation · Technical Documentation

WORK EXPERIENCE

Technical Support Manager
Theos Seminary · Remote — Jan 2022 – Present

- Own the full LMS stack for a faith-based online seminary — Moodle configuration, plugin management, server performance, and user experience across faculty and students.
- Reduced average student support ticket resolution time by 40% by building a custom Moodle block plugin for self-service troubleshooting and FAQ.
- Integrated third-party APIs for course enrolment automation, cutting manual admin effort by 60%.
- Maintain uptime SLA >99.5% via proactive monitoring, regular Moodle core upgrades, and security patch management.
- Collaborate with academic staff to translate instructional design requirements into scalable Moodle course structures.

Technical Consultant — LMS & PHP Systems
SkillWare4u · Remote · Part-Time — Mar 2022 – Present

- Advise on Moodle architecture, plugin strategy, and backend PHP system design for e-learning product teams.
- Conduct technical audits of existing LMS platforms and deliver actionable performance and security improvement roadmaps.
- Support product teams in defining API integration patterns for third-party tool connectivity.

Technical Lead — Web & LMS Development
NASMAK Pty. Ltd. · NSW, Sydney, Australia · Remote — Dec 2018 – Dec 2020

- Led a cross-functional remote development team delivering Moodle LMS platforms for multiple Australian registered training organisations (RTOs).
- Architected and deployed custom Moodle plugins including USI API integration (Australian Government compliance) — enabling automated unique student identifier verification at enrolment.
- Delivered LMS for Australian Health & Management Institute (AHMI) and Informa Connect Australia — both serving hundreds of enrolled professional learners.
- Managed full SDLC: requirements gathering, sprint planning, code reviews, QA, deployment, and post-launch support.
- Performed comprehensive application audits, identified critical security vulnerabilities, and implemented fixes reducing risk exposure across 4 live platforms.

Lab Engineer

English (Professional) ●●●●○
Urdu (Native) ●●●●●

RESEARCH INTERESTS

- Data Mining
- AI & Machine Learning
- Natural Language Processing (NLP)

COMSATS University Islamabad — Vehari Campus · Vehari, Pakistan Sep 2019 – Oct 2021

- Delivered practical lab sessions for 150+ undergraduate students across Web Engineering, Programming Fundamentals, and Database Systems courses.
- Designed lab exercises and assessment rubrics aligned with HEC curriculum standards.
- Mentored students on PHP, MySQL, and web development fundamentals — several students went on to secure software industry positions.

Senior Web Developer & Tech Lead

ZpZen Technologies · Vehari, Pakistan Mar 2018 – Aug 2019

- Led a 5-person development team building real-time web applications in PHP (Yii2, CodeIgniter) and WordPress.
- Delivered full-stack projects — findcut.com, solemole.com, vosshop.uk, move2canada.info — from architecture to production deployment.
- Implemented RESTful APIs with OAuth 2.0 in Yii2 PHP, consumed by iOS/Android mobile apps and Windows desktop software.
- Managed task allocation, sprint cycles, code reviews, and ran weekly training sessions for junior developers.

Visiting Lecturer — Computer Science

Superior College, Vehari · Vehari, Pakistan Dec 2016 – Jan 2018

- Taught programming, web technologies, and IT fundamentals to undergraduate cohorts of 40–60 students.
- Developed course material, assignments, and examination papers aligned with Punjab Higher Education Commission standards.

KEY PROJECTS

Australian Health & Management Institute — Moodle LMS

http://lms.ahmi.edu.au/

Moodle · PHP · USI API · Custom Block Plugins · MySQL

Enterprise Moodle deployment for a government-regulated Australian health training provider. Built USI API integration for automated student identifier verification at enrolment — a compliance requirement for all Australian RTOs. Developed custom block plugins and institutional theme customisation to match accreditation branding standards.

Informa Connect Australia — Enterprise LMS www.lms.informa.com.au/

Moodle · PHP · SCORM · Multi-Tenant Architecture

Moodle LMS for one of Australia's largest professional development event companies. Configured multi-cohort enrolment workflows, SCORM-compatible course delivery, and automated certificate generation for professional CPD programs.

ACPD — Online Learning & Payment Portal www.acpd.com.au/

Moodle · PHP · Payment Gateway · Laravel · MySQL

Full web portal for Australian College of Professional Development — combining institutional profiling, online course catalogue, Moodle LMS backend, and Stripe payment integration into a single platform.

SoleMole — Mobile Merchant Hub solemole.com/

Yii2 · PHP · OAuth 2.0 · REST API · MySQL · Bootstrap

Mutually integrated business platform for mobile device merchants — inventory management, stolen IMEI complaint system, order processing, and customer-facing marketplace. Full-stack: REST API backend in Yii2 consumed by iOS/Android apps and a Windows desktop application.

Bizhere — Uber-Style Service Marketplace www.bizhere.com.au/

WordPress · PHP · REST API · Basic Auth · AdForest Plugin

On-demand service marketplace connecting service providers with customers across Australian cities. Delivered backend API services, WordPress customisation, and AdForest plugin integration for listing management.
